

Finger Alert Extreme (+180°)

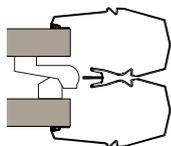

door finger guard for doors with a large opening angle

Arte Viva Door Finger Guards - Finger Alert Extreme to **prevent finger entrapment at the hinge side of doors with a big opening angle**. Extreme profile to cover the door gap on the push side of the door and two click strips to facilitate installation. Fastening with tesa®-tape (pre-applied) or screwing to the door and door frame. High-quality plastic. Standard colors **white RAL 9016 and anthracite RAL 7016**. **Standard lengths 180 cm and 195 cm (for wooden, steel and glass doors with a door gap distance of over 20 cm)**. SKG-tested for 250,000 opening cycles and complies with both EN 16654 and NEN 8654 norms.
